This is a sample document.

It should have the following PDF Document Properties:

Title: PdfParser PDFDocEncoding Test

Author: Brian Huisman

Subject (or Description): This value uses PDFDocEncoding. This is the segment of PDFDocEncoding that differs from CP1252. This excludes the fi and fl ligatures since Adobe Acrobat automatically transcodes them to literal "fi" and "fl" when saving Document Properties. •†‡…—–ƒ‹›−‰„""''‚™ŁŒŠŸŽıłœšž A line-feed inserted by Adobe between two of the special characters should be repaired.

Keywords: This value should trigger Adobe to store this string using UTF-8 escaped bytes. However this means Adobe's added line-feeds often destroy multibyte characters. ˘ˇˆ˙˝¸˜•†‡…—–ƒ‹›−‰„""''‚™fiflŁŒŠŸŽıłœšž€¡¢£¤¥¦§¨©ª«¬®¯°±²³´µ¶·¸¹º»¼½¾¿ÀÁÂÃÄÅÆÇÈÉÊËÌÍÎÏÐÑÒÓÔÕÖ×ØÙÚÛÜÝÞßàáâãäåæçèéêëìíîïðñòóôõö÷øùúûüýþÿ Two line-feed insertions in this value should be repaired.
